

To Whom It May Concern: I am opposed to any rule imposing therequirement of a "broadcast flag" for digital content. I am further opposed to any rule prohibiting the importation, sale, or distribution of equipment which does not honor such a flag. I believe that such a "Broadcast flag" would severely limit my fair use rights, and would do nothing to prevent actual piracy of content. Further, enactment of such a rule would tend to severely restrict fair use archives (such as libraries), and future utilization of content in a fair use manner. This rule would limit competition, restrict choices and raise prices for consumers. Thank you for your consideration.
